

Library Management System (LMS)

Library is automated by SOUL software. Software for University Libraries (SOUL) is an state-of-the-art integrated library management software designed and developed by the INFLIBNET Centre based on requirements of college and university libraries. It is a user-friendly software developed to work under client-server environment. SOUL provides Online Public Access Catalogue (OPAC) / WEBOPAC facility which enables users to search the library's collection and guides them to precise location. All work related to issue and return has been computerized . All books are bar-coded .
